Web Developer and Business Graduate, with a background in agile development and experience in start-up business development. I am a highly motivated self-starter. I have always been passionate about bringing ideas into reality, demonstrated in my own self-funded projects. This has been a major driver in my interest in technology, as the scope of development is almost unlimited. I feel my unique experience in both business studies and web development would make me an effective addition to a growing organisation.

SKILLS:

- Front End: **HTML5, CSS3, JavaScript, React**
- Backend: **Node.js, MongoDB, Mongo Atlas**
- Tools: **Trello, Glitch, GitHub, Slack, Git, Terminal, Postman**
- Methodologies: **Agile Project Management, Scrum**

EDUCATION:

Full Stack Web Developer - Boot Camp

Code Your Future

2018 – 2019:

London

Knowledge: **HTML, CSS, JavaScript, React, MongoDB, JSON, RESTful API, HTTP requests.**

PROJECTS:

Glossary:

Link: <https://github.com/ahmedahashim/CYF-Glossary>

Scenario: My team and I, we responsible for delivering a glossary for technology-based technical terms. We were a team of 4 with a deadline of 24 days. I was the Project Manager and Front-End developer for the project. We successfully completed a working product on time and demonstrated its functionality to stakeholders.

Contribution: UX/UI design, Prototyping, Front-end Development, Project Management.

See Your Future - Capgemini:

Link: <https://github.com/eddientim/CYF-CAPGEMINI>

Scenario: My team and I entered a competition hosted by Capgemini. Our object was to deliver a platform to connect inexperienced developers with companies, helping them to find out more about the industry and job roles. I was the Project Manager and Front-End developer for the project. We were a team of 8 and had a 30-day deadline. We successfully delivered a working product meeting the deadline and won 'Best Engineered' and 'Most Innovative' awards - 2 of 3 awards available. I was voted by my peers to receive the 'Hero Helper' award, due to my contributions.

Contribution: UX/UI, Prototyping, Front-end Development, Project Management.
